# ACHIEVING TOTAL INTERCONNECTIVITY IS TOUGH,
## BUT IT COULD BE SIMPLE.

**bcx.co.za/exa**

**BCX EXA**

Total interconnectivity can be achieved through leading edge integration if you choose the right partner who has a digital way of thinking. You need a partner who runs to challenges with the drive to find new ways to solve, think, and act to make the journey from where you are to where you want to be a whole lot simpler.

## WHAT IS EMBEDDED INTEGRATION?

Embedded Integration from BCX Exa provides leading edge integration solutions and services on-premise or via the cloud to facilitate and assist you to achieve total interconnectivity. The Services and Solutions provided connect siloed systems together, creating the foundation for the enablement of a world class digital organisation. Harnessing integration ultimately enhances your business core assets namely: People, Process and Technology.

## WHAT DOES IT DO?

BCX Exa Embedded Integration is business application integration and integration analysis to identify the maturity of your business to enable automated information flows, as well as:

- API Development
- ESB Maintenance and Support
- Integration Architecture & Governance
- Integration Cloud Migration Services
- Integration Resource Augmentation

## VALUE PROPOSITION

**Integration Centre of Excellence -** Designing world class CoE's based on industry best practices and tried and tested industry experience.

**ESB Modernisation and Migration -** Enabling future ready integration, focused on new-age lightweight integration to allow for effective and efficient integration practices.

**Integration Support:** we use Embedded Integration that provides end-to-end, 24x7x365 support for all integration environments, with customisable support packages designed to provide maximum productivity and stability within your Integration Production environment.

## Integration Design & Governance

- SOA
- Cloud Migration
- CI / DevOps
- API

## Integration Support

- Deployment & Release
- Operations Support
- Interface & Platform Support
- SLA Management

## WHY CHOOSE BCX EXA?

We have more than 35 years' experience in the integration landscape. Our Embedded Integration will integrate your systems to form a single and intelligent source. We can successfully facilitate migration from on-premise to integration in the cloud.

- Creditability in implementing Complex integration solutions
- Experience in Enterprise Customers
- Vast Partner Eco-system such as [IBM, Oracle, MS Globalscape, WS02, AWS, Google, Tibco]
- Depth and Breadth in Integration capabilities
- Proudly South African, local skills & capability
- Customer Excellence via credible customer case studies

## FEATURES AND BENEFITS

| Features | Benefits |
|---|---|
| **Business intelligence and enabling technology assets** | Eliminates information silos across your organisation. Connects all your systems to improve access to information that can be shared easily. Enables you to make more informed business decisions based on consolidated information. |
| **Cost savings** | Reduces costs of managing disparate information flows from legacy and heterogeneous landscapes. Integrates systems to use existing infrastructure for composite solutions. On-premise integration to cloud integration migration. |
| **Work efficiencies** | Streamlines processes and procedures through automation. Sustainable and scalable on-going integration. |

## KEY CAPABILITES

- Microservices + Containerisation
- API Development across chosen hyperscale's
- Certification on core technologies
- Smart iCoE Support Operations
- DevOps Engineers
- Cloud Architects/ Developers

## SERVICE COMPONENTS

### Integration Design:

- Delivers a holistic service-oriented architecture (SOA)
- Technology-neutral enterprise application integration (EAI) that maintains information consistency across platforms
- Continuous integration (CI) and agile integration (DevOps)
- Architecture Governance where we run architecture design review (ADR) sessions and architecture authority boards

### Integration Implementation:

- Management of service-oriented integration
- Management of API integration
- Management of integration cloud services (iPaaS)
- Implementation of integration infrastructure
- Migration from legacy platforms
- Integration Architecture Maturity and Integration Governance

### Integration Support

- Deployment and releases
- Operations support
- Support of management activities
- Reporting and documentation
- Maintenance
- Mature SLA Managed Services

## AVAILABILITY

This product is available nationwide. For more information and pricing details, contact your account manager, or email **BCXExa@bcx.co.za**
