

## PROTECT YOUR ORGANISATION AGAINST INTERNET THREATS WITH **BCX SECURE WEB GATEWAY POWERED BY CISCO UMBRELLA WEB**

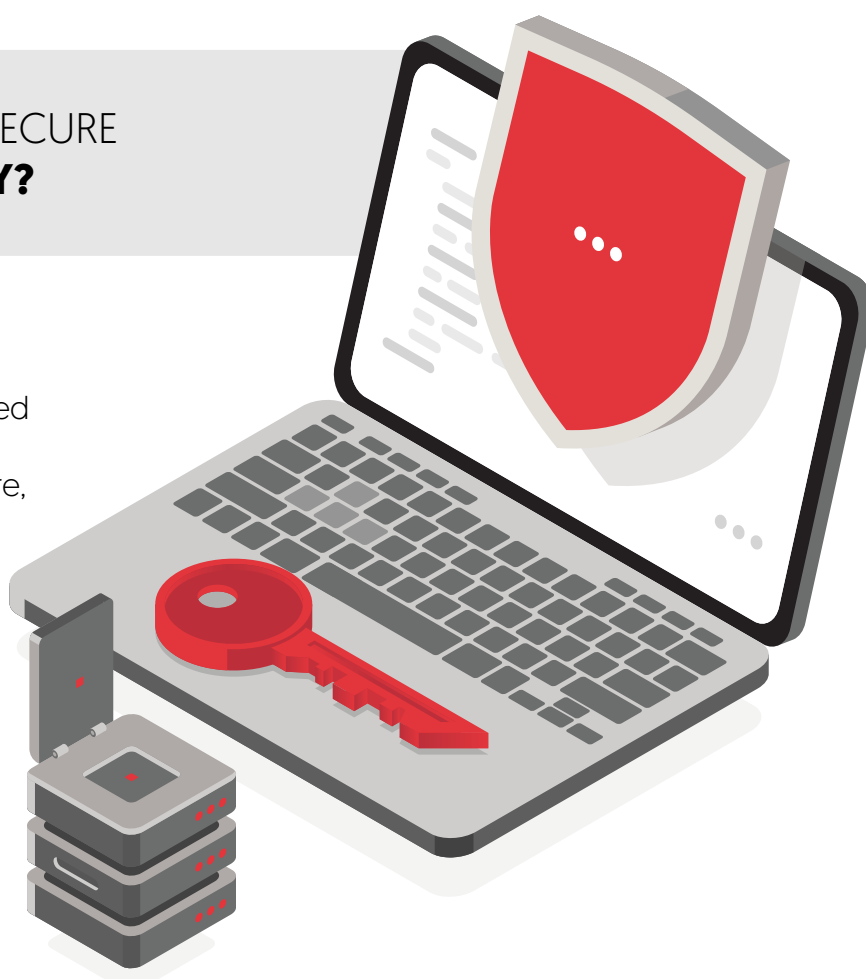

### WHAT IS BCX SECURE **WEB GATEWAY?**

#### **BCX Secure Web Gateway is:**

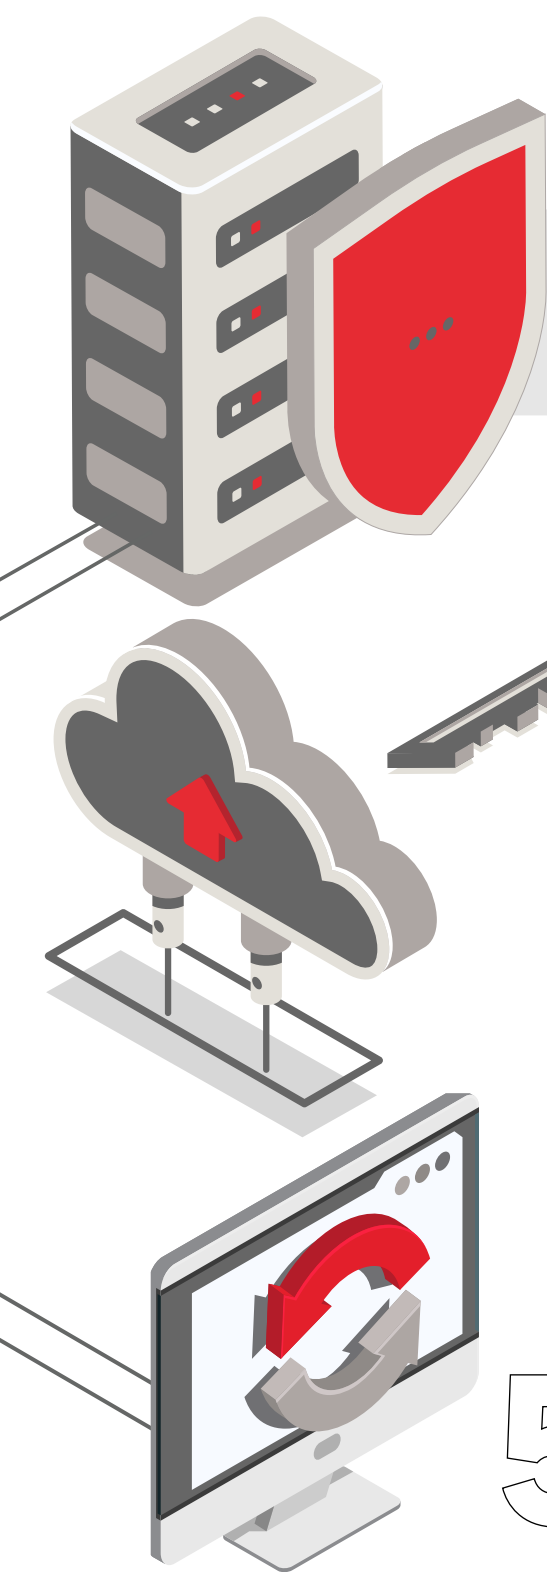

a Cisco Umbrella powered cloud-based threat defence platform that protects organisations against phishing, malware, ransomware and cyber threats within the public Cloud.

#### **How does it work?**

The solution requires no hardware or software installation on devices. The prevention of threats happens at DNS level without examining traffic data.

### FEATURES **AND BENEFITS:**

- 1 Monitoring and reporting via API.
- 2 Policy enforcement and security setting at the DNS layer, The URL and IP blocking ensure protection from threats.
- 3 Integrated with SD-WAN, Meraki MR, Cisco Integrated Services Router 1K & 4K, Wireless LAN Controllers and Cisco Mobility Express.
- 4 Technology partner online support via email, with optional telephone and dedicated technical account management based on the customer purchased package.
- 5 OEM online support via email, with optional telephone and dedicated technical account management based on the customer purchased package.

#### **Why choose BCX?**

BCX is the first service provider to go to market with this offer within South African borders.
