

# SAFETY FIRST.

THEN OPEN ACCESS TO CUSTOMERS AND SUPPLIERS.

**Secure organisational data with cloud-based threat defence.**

## WHAT IS BCX SECURE WEB GATEWAY?

BCX Secure Web Gateway is a Cisco Secure Web Gateway cloud-based threat defence on the Internet that blocks requests to malicious destinations such as DNS domains, URL or IP addresses before establishing connections. It protects organisations against phishing, malware, ransomware and cyber threats within the public Cloud.

## HOW DOES IT WORK?

The solution is a purely Cloud-based platform and requires no hardware or software installation on devices. The prevention of threats happens at DNS level without examining traffic data.

## FEATURES AND BENEFITS:

- Policy enforcement and security setting at the DNS layer, The URL and IP blocking ensure protection from threats.
- Technology partner online support via email, with optional telephone and dedicated technical account management based on the customer purchased package.
- Integrated with SD-WAN, Meraki MR, Cisco Integrated Services Router 1K & 4K, Wireless LAN Controllers and Cisco Mobility Express.
- Simplified protection on cloud connectivity, network uptime, confidential information and unnecessary revenue losses due to cyberattacks.
- Monitoring and reporting via API.

## PRODUCT OPTIONS:

**WLAN** – Wireless; basically, for Wi-Fi user protection.

**Basic** – also named ‘Professional’; targeted at Small business customers.

**Standard** - tailored for mid-market.

**Advanced** – also named ‘Platform’ tailored for enterprise customers.

## WHY CHOOSE BCX?

BCX is the first service provider to go to market with this offer within South African borders.
